# A Bot not like the Others...

- User-friendly interface
- Easy To Use
- Very Fast Execution Time

# Help Section

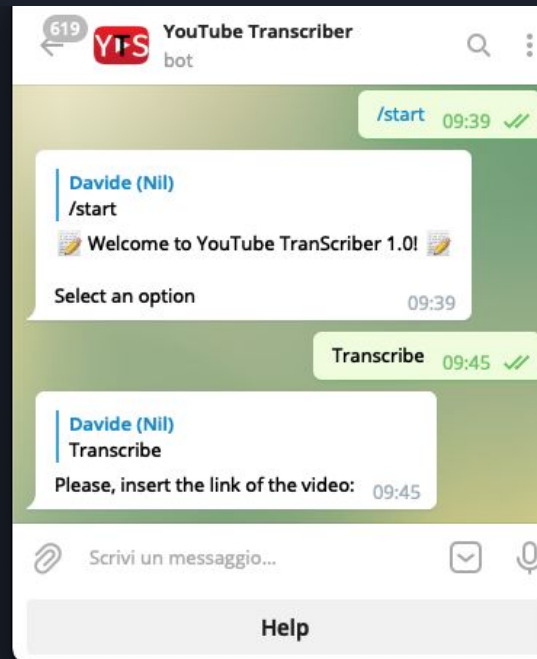

## Easy Instructions for new users

# Main Feature

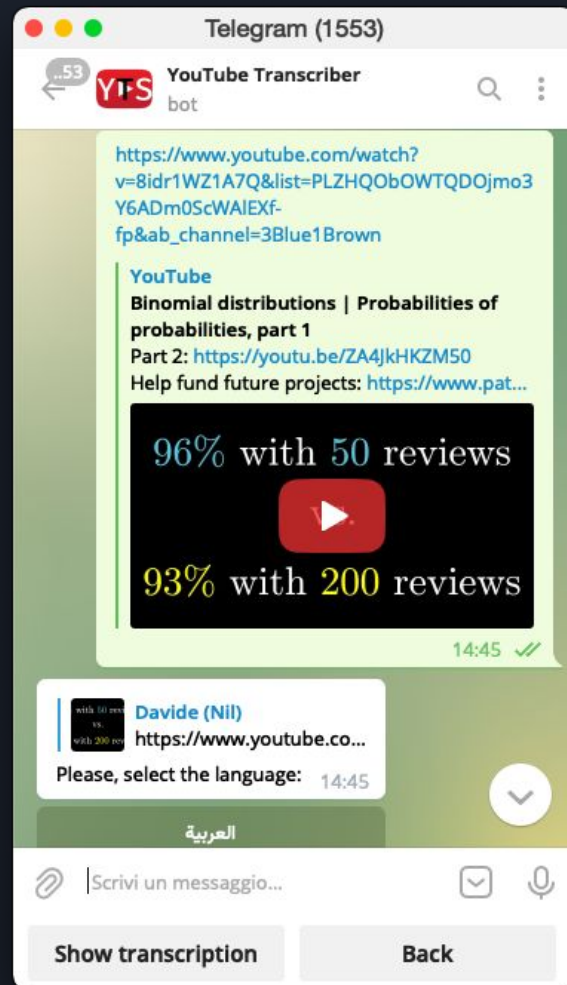

Inserting the youtube Video Link:

1. Get the statistics
2. Description
3. Video Captions

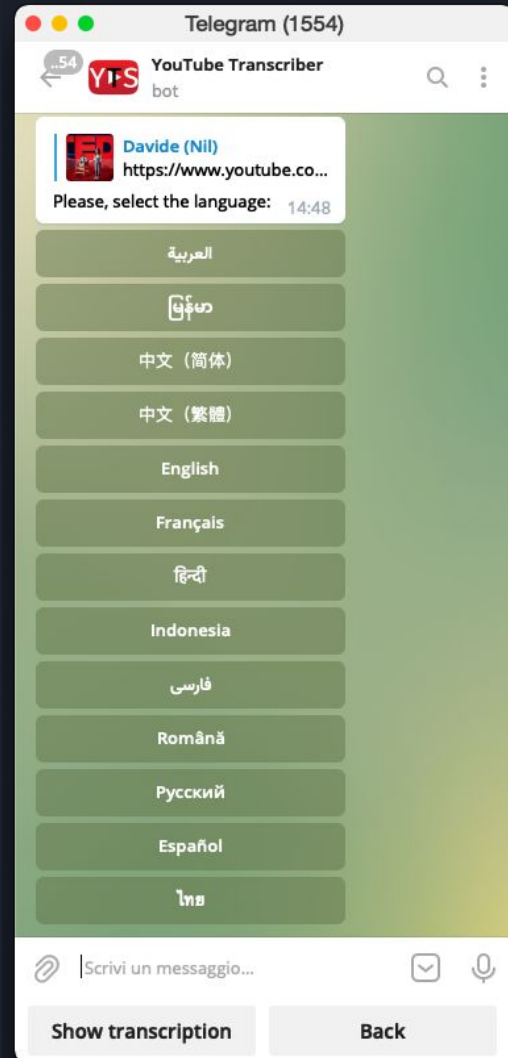

# Multi-url format supports

- Playlists
- Channels
- Shortened urls
- Embedded urls
- 50+ other formats

# Multi-Language Support

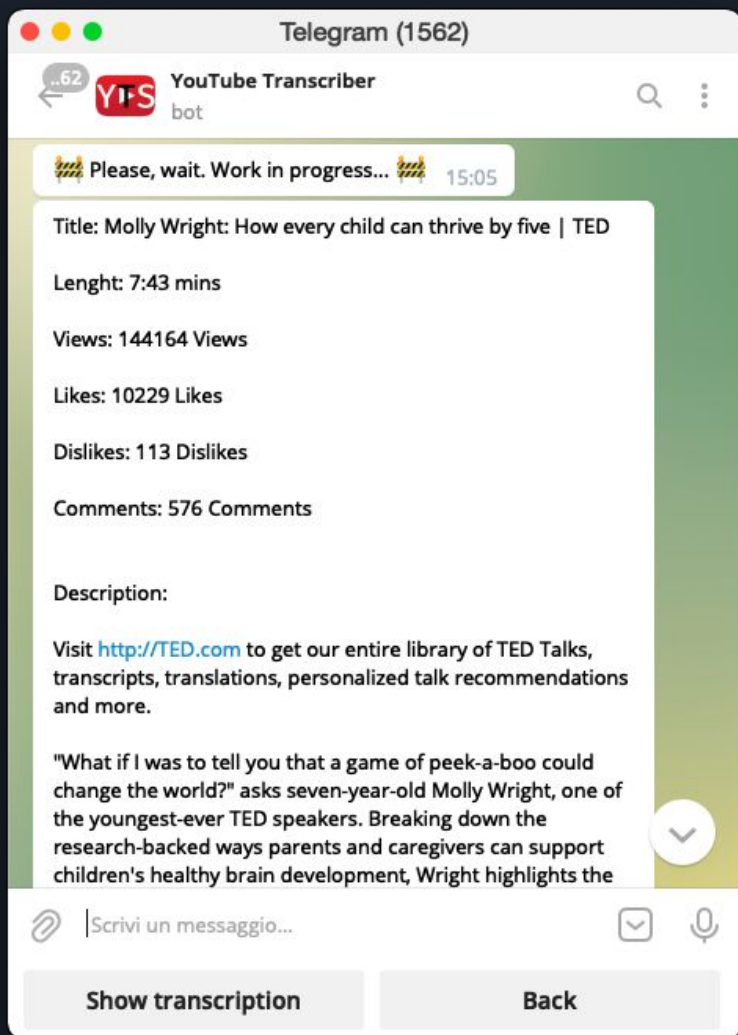

- Display of any of all the available CC languages
- Interactive Selection Menu

# Video Stats

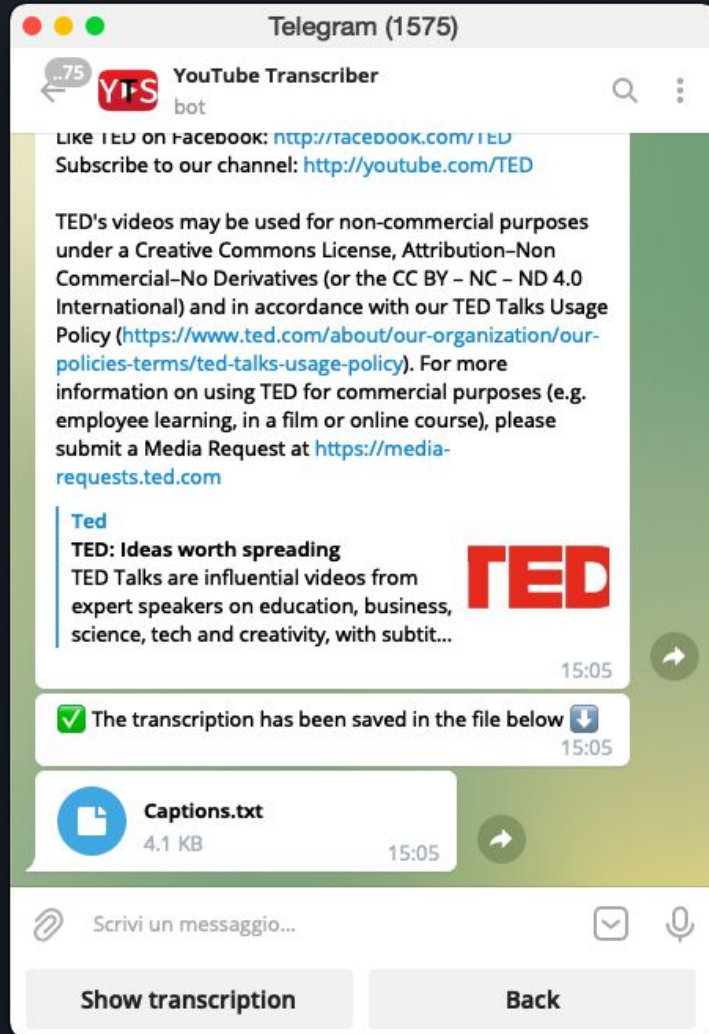

## Detailed Video statistics :

- Title
- Length
- Views
- Likes
- Dislikes
- Comments
- Description

# Captions

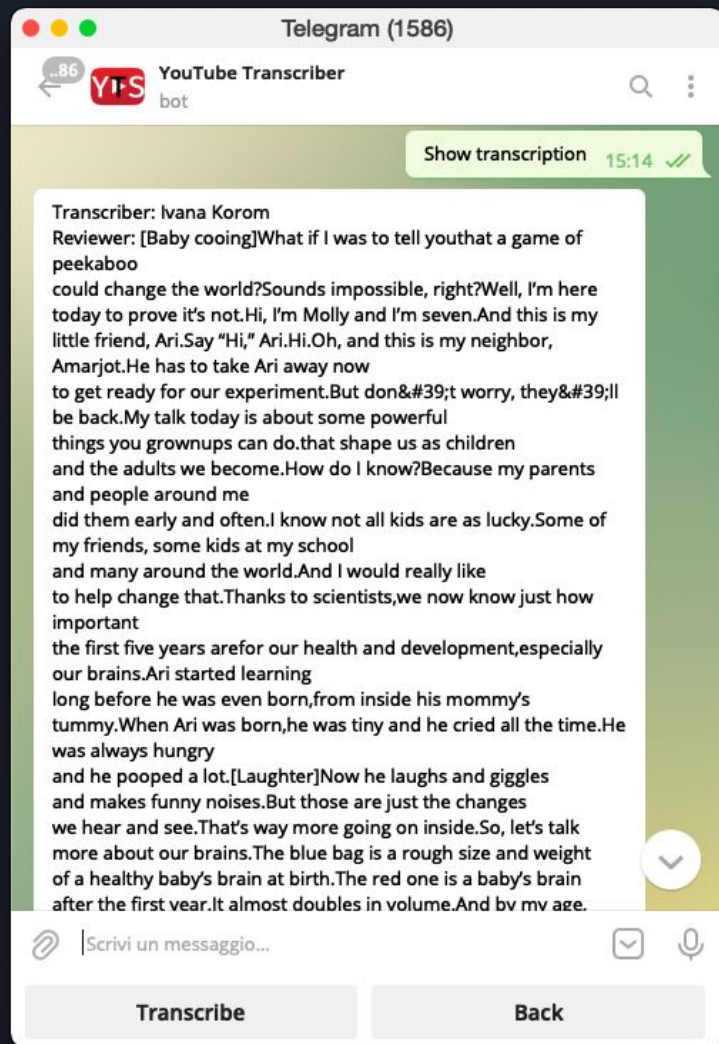

- Automatic .txt export
- Clean pure text without TimeStamps
- Easy to be shared

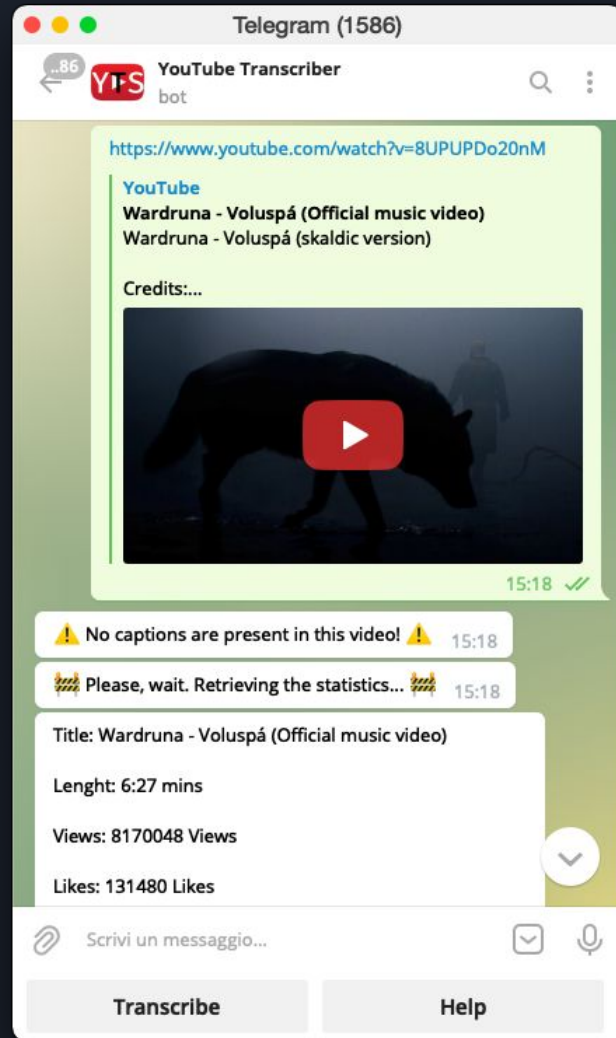

## Captions

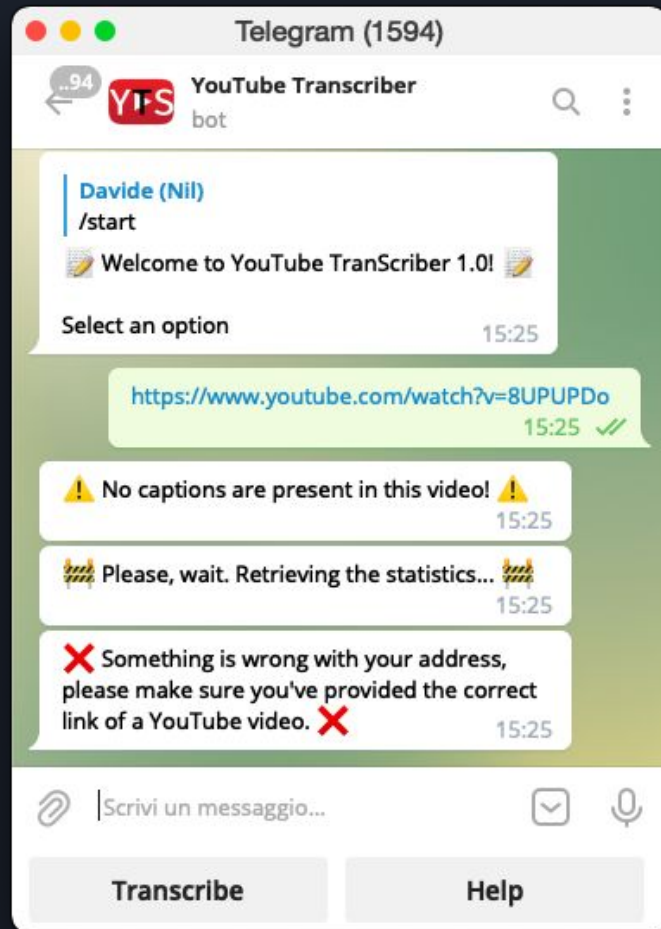

To see the captions inside the app as a series of messages is as easy as clicking a button: “Show transcription” to get this result:

Not all the videos are loaded with CC, if captions are not available, a warning message will be displayed and only the statistics will be shown

If the url is wrong, an alert message is displayed telling the user to check the inserted address

Thank You!
